

LOUIS CHEVROLET
SWISS WATCHES

INSTRUCTION MANUAL LC21

Version 1
October 2021

Congratulations and thank you for your purchase.

**By choosing this watch you have entered the
Louis Chevrolet universe!**

Being of Swiss origin and born just a few kilometers from our factory, we had to honor Louis Chevrolet, the illustrious man who made history.

From car mechanics to watchmaking precision, there was only one step to take. The latter was all the easier because his father was himself a talented watchmaker.

You are now one of the thousands of ambassadors of our brand!
Welcome to the Louis Chevrolet family

Watch presentation

- 1 - Minutes hand
- 2 - Hours hand
- 3 - Seconds hand
- 4 - Date
- 5 - Crown

A : Normal position

B : Date correction position

C : Setting time and day position (stopping second)

Chronograph

- 6 - Hours counter
- 7 - Minutes counter
- 8 - Seconds counter
- 9 - Tachymeter scale
- 10 - Push-button I and II

Quick date correction

- Pull the crown out to position B.
(watch still running)
- Turn the crown anticlockwise until the required date appears.
- Push the crown back into position A.

Setting the time

- Pull the crown out to position C.
(watch stopped)
- Turn the crown, until the current time is displayed.
(remember the 24-hour cycle)
- Push the crown back into position A.

Setting the date, time (1/2)

- Pull the crown to position B.
- Turn the crown anticlockwise until yesterday's date appears.

Setting the date, time (2/2)

- Pull the crown out to position C.
(watch stopped)
- Turn the crown until the correct date and day appears.
- Continue to turn the crown until the correct time appears.
(remember the 24-hour cycle)
- Push the crown back into position A.

Chronograph: Basic function

- Start the timing by pressing on I.
- Stop the timing by pressing on I then read the measured time on the counters.
- Press on II to reset.

Chronograph: Accumulated timing

- Start the timing by pressing on I.
- Stop the timing by pressing on I then read the measured time on the counters.
- Restart the timing by pressing on I.
- Stop the timing by pressing on I then read the **total** measured time on the counters.
- Press on II to reset.

Chronograph: Intermediate or interval timing

- Start the timing by pressing on **I**.
- Stop the timing by pressing on **II** then read the measured time on the counters. (the timing continues in the background)
- Restart the timing by pressing on **II**. (the chronograph hands are advanced to the ongoing measured time)
- Stop the timing by pressing on **I** then read the **final** measured time on the counters.
- Press on **II** to reset.

Using the Tachymeter scale

- The tachymeter enables you to measure your average speed over a distance of 1 km or 1 mile (for speeds in excess of 70 km/h or 70 mph).
- Start the timing by pressing on I at the beginning.
- Stop the timing by pressing on I at the end then read the speed on the tachymeter scale.
- Press on II to reset.

Adjusting the chronograph hands to zero position (1/2)

If the chronograph hands are not in their correct zero positions, then they have to be adjusted.

- Pull the crown out to position C.
- Keep I and II pressed simultaneously for 2 seconds.
(the second counter hand rotates by 360°.
Corrective mode is activated)

Adjusting the chronograph hands to zero position (2/2)

- Adjust the seconds counter hand by pressing on I.
- Press on II to adjust the next counter.
- Adjust the minutes counter by pressing on I.
- Press on II to adjust the next counter.
- Adjust the hours counter by pressing on I.
- Push the crown back into position A. (can be carried out at any time)

NB : To adjust precisely, press briefly.

To adjust quickly, press in continuously.

"NEVER
GIVE UP"
